FANNI MELLES

**PhD in Future of Cities, Architectural Engineering MSc
OFC Community Engagement and Placemaking collaborator**

"When it comes to the future of cities, I am passionate about conscious and collaborative urban evolution. I believe that each city has its own future, and can establish a vision-strategy-tactic self-reinforcing feedback loop which brings them to the desired direction, and I am here to help that."

Fanni Melles, PhD, is a trailblazer in shaping urban futures, blending her architectural genius with profound research insights and unmatched project management prowess.

Experience
Before her PhD studies, Dr Melles was the project manager for the New National Gallery and a master planner for Hungary's biggest urban development in the last 150 years (911 412.13 m2) across 10 design teams. A Swinburne University alumna (PhD, 2023), she specialised in the practical implementation of the future of cities and smart cities concepts.
Through her podcast, What is The Future for Cities? with more than 200 episodes (and counting!), and consulting firm, Vitruvian, Dr. Melles guides global cities towards conscious and collaborative urban evolution, demonstrating that futures are crafted by understanding the heart of stakeholders and communities.

Career Goals
Being involved in the first space city planning.

Interests
Assisting cities in their conscious urban evolution.
