

NEHA SHETTY

Water Engineer + Consultant
for Water Remediation

-

OFC Partnerships and
Community Sub-Coordinator
+ Program Delivery

“ For me, Sustainability is a solution to ongoing environmental issues and a way we can utilise remaining earth’s resources for our existence. I envision our future cities to be a zero-waste and zero-carbon zones that work on multiple engineering, design, environmental and social aspects to create a circular economy. ”

EXPERIENCE

Neha has dedicated her time to the Green Impact Program at the Monash Sustainability Institute and has been involved in various environmental organisations. Specialising in Environmental Security, Neha hopes to continue to refine her skills and knowledge to engineer innovative solutions that ensure better water quality.

INTERESTS

Fav Sustainable Development Goal:

Goal 6, Clean Water and Sanitation
